The "Liberty" work order management system was specifically developed for companies that use CNC machines to mill precision parts to support them in meeting the requirements of ISO 9000-2001 certification. If your company manufactures items using materials, labour and subtrade work, you will find that Liberty is very useful right out of the box. If your company has unique needs that require customization of Liberty, GreenTree Software offers the consulting services to complete these customizations to your specifications.

Work Order Management for small to medium manufacturing shops.

Liberty

- Familiar web based interface
- Powerful industry standard reporting
- Report customization available
- Cost accounting for production costs
- Recording features to help you meet ISO 9000-2001
- Cost driven quoting allows for more competitive quoting
- No client software to install on PCs
- Best Value and Lowest Total Cost of Ownership in its class
- Supports Unlimited users
- No special hardware required

"The system is working great! It gets the job done." Bill Welton

"The system is simple and flexible, allowing us to process several hundred workorders a month. The system provides the paper trail to satisfy our ISO certification" Jim Marshall Sr. TCS
